

## Egypt to launch tenders for wind power plants

- Egypt: 23 hours, 19 minutes ago

Egypt's electricity minister, Hassan Younes, has said the country plans to launch a tender next month to choose companies to build the first phase of 1,000 megawatt wind power plants in the Gulf of Suez, Reuters has reported. The power plants will be constructed on a build-own-operate basis, Younes said. The tender process consists of two phases, each for 500 MW.
