Dubai: Dubai Municipality is undertaking a Dh107-million project to provide comprehensive drainage and storm-water network for Al Warqa 1, said Engineer Hussain Nasser Lootah, Acting Director General of Dubai Municipality.

He said the project, which is expected to be complete by the end of 2010, is part of the civic body plans to link new residential areas with the city's main drainage network and reduce the percentage of sewage water transported by tankers to five per cent by 2011.
