WHY EXHIBIT AT MEE 2019?

Hosted by the UAE Ministry of Energy and based in Dubai, Middle East Electricity provides the opportunity to conduct face-to-face meetings essential for building and sustaining business relationships in the Middle East.

Leveraging Dubai's position as the regional re-export hub, the exhibition facilitates access to challenging and hard-to-reach markets through partnerships with distributors and agents.

As an annual gathering place for over 1,500 participating companies, MEE provides our exhibitors the chance to judge market demand, gain valuable industry knowledge and develop new areas of business.

PRODUCT SECTORS

The event is split into five key product sectors – power generation, transmission & distribution, lighting, solar and energy storage and management solutions.

POWER GENERATION 

Power Generation at MEE is the region's leading, largest and longest running trade exhibition for both conventional and stand-by power related product manufacturers & distributors - and the ideal place to meet buyers looking to source products from either sector.

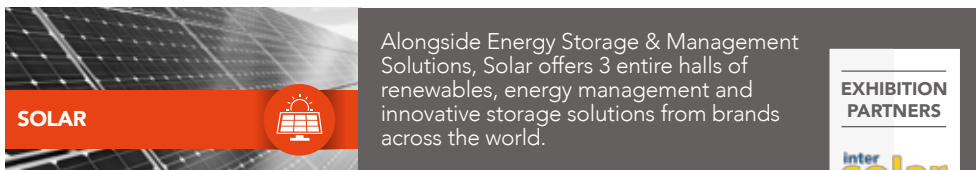

TRANSMISSION & DISTRIBUTION 

MEE's longest running and most successful sector, Transmission & Distribution spans more than 8 halls, from the industry's bellwether international companies to the 23 individual country pavilions, the entire value chain of products is represented here.

LIGHTING 

One of the exhibition's fastest growing sectors, The Lighting Hall provides a dedicated space for international manufacturers & distributors to display their products to the MEA market.

SOLAR 

Alongside Energy Storage & Management Solutions, Solar offers 3 entire halls of renewables, energy management and innovative storage solutions from brands across the world.

ENERGY STORAGE & MANAGEMENT 

In it's second year, Energy Storage & Management at MEE is MEA's most comprehensive event for the sector, with international manufacturers showcasing the latest technologies to the region's leading buyers.

SOLAR AND ENERGY STORAGE & MANAGEMENT BRANDS AT MEE

Ingeteam

SUNPOWER®

WORKSHOPS

MEE provides career advancing professional training workshops, certificated by CPD. Each workshop is free to attend and all attendees gain CPD points after the event. Topics for workshops by Solar Energy International at MEE 2018 included:

- Configurations of PV Systems with Energy Storage
- Technical Overview of Grid Connected PV System Design and Installation

TECHNICAL SEMINARS

Present your latest products and innovations or case studies at our exhibitor led Technical Seminars. These free to attend sessions focus on the Power Generation, Solar/Energy Storage and Management Solutions and Transmission & Distribution sectors. Companies that presented at this year's edition included **Jinko Solar**, **SMAPPEE** and **Ingeteam** to name a few.

“Dubai is very, very focused on the renewable and solar markets, but the strongest point of this exhibition is that we meet contacts not only from UAE and the Middle East area but Africa and the Eastern part of Europe as well.”

Manuele Ceccarelli
Business Development Manager, Ingeteam
